### About Me

I'm Onos, an enthusiastic fullstack web developer dedicated to creating and learning from open-source software that serves both developers and the global community. With expertise in modern web technologies like GO, React, Next.js, and TypeScript, I specialize in building scalable applications that solve real-world problems.

### Experience

#### Web-developer Intern

📅 12/2024 - Present

##### EaseLab

Helped in developing EaseLab Africa, a medical diagnostics platform to save millions of Africans

#### Fullstack Developer

📅 06/2024 - Present

- Developed Zendo, a task and project management platform with Next.js, TailwindCSS, MongoDB, and GO for backend services.
- Built Pixtrends, a vibrant community platform for photography and design trends using TypeScript, Next.js, TailwindCSS, and MongoDB.
- Created TaleGenie, an AI-powered storytelling website where users can create, save, publish and read stories using Next.js, MongoDB, and TailwindCSS.
- Worked with EaseLab to provide a cutting edge UI for the medical diagnostics platform.

### Featured Projects

#### Zendo (task management site)
